

User Manual

Welcome to StudyBuddy

StudyBuddy helps you stay on top of your studies by bringing your schedule, tasks, timer, and grades into one app.

Getting Started

Step 1 — Add your subjects

Tap the **Subjects** tab (book icon, far right). Tap **+** in the top right. Enter the subject name, pick a colour and icon, then tap **Add**. Repeat for each course.

Step 2 — Add your timetable

Open a subject → tap the **Schedule** tab → tap **+** → fill in the class name, room, day, start and end time. For A/B week rotations, set the Week field accordingly.

Step 3 — Add tasks

Tap the **Tasks** tab → tap **+**. Fill in the title, choose the subject, set a due date, and pick a priority (Low / Medium / High). Toggle "Set Reminder" to get a notification before it's due.

Today Screen

The **Today** tab shows everything happening today: your scheduled classes in time order, and all tasks due today with checkboxes.

- Tap a checkbox to mark a task complete — it gets a strikethrough and moves to Done
- The flame banner at the top shows your current study streak
- Overdue tasks appear in red

Tasks Tab

All tasks grouped into Overdue / Today / This Week / Later.

- **Filter by subject** using the coloured chips at the top
- **Search** using the search bar
- **Swipe left** on a task to delete or edit it
- **Swipe right** to mark it done instantly
- Tap the eye icon to show/hide completed tasks

Focus Timer

Tap the **Timer** tab. Choose **Pomodoro** (automatic 25-minute focus + 5-minute break cycles) or **Free Study** (counts up freely).

1. Tap the subject card to choose what you're studying
2. Tap **Start Session**
3. The purple ring counts down. When it reaches zero, a notification sounds and the break begins automatically
4. Tap **Pause** to pause, **Skip** to jump to the next phase, **Stop** to end the session early

Sessions are saved automatically — even partial ones of more than 5 seconds.

Stats Screen

Shows a summary of your study habits:

- **Day streak** — consecutive days you've logged at least one session
- **This week** — total hours studied this week
- **Tasks done** — tasks completed this week
- **Peak focus time** — the hour of day you study most
- **Daily bar chart** — hours per day over the last 7 days
- **By subject bars** — how your time is split between courses this week
- **Grades** — current average per subject

Grades & Notes (inside a Subject)

Tap any subject in the Subjects tab to open its detail view.

Grades tab — tap + to add a score. Enter the title (e.g. "Midterm"), your score, and the max score. StudyBuddy calculates the percentage and letter grade automatically.

Notes tab — tap + for a quick note. Tap any note to open the full editor. Changes save automatically as you type.

Schedule tab — shows all recurring classes for this subject.

Notifications

StudyBuddy sends you:

- A reminder before any task whose "Set Reminder" is toggled on
- A sound + notification when each Pomodoro phase ends
- A daily 8 PM nudge to study if you haven't yet that day (to protect your streak)

Allow notifications when prompted on first launch. You can manage them in iOS Settings → StudyBuddy → Notifications.
